

Koal Keeper
Live ember recovery tool

This is a real time saver and simplifies fire maintenance. Sift out the embers in your woodstove or fireplace while getting rid of unwanted ash. Just scoop up a shovel full, shake the ashes through the grate, and preserve the live embers for starting your next fire. Keep the fire going continuously without fire-starters. Black powder coated steel with hanging hole in handle. 18"L, USA made. **#562-5533**; \$12.95

Fiberglass Stove Door Gasket
Restore air-tightness of stove

Replace worn out or cancer-causing asbestos gaskets with our woven fiberglass. Fire-proof and can't fray. Easy to install with our cement (below). USA made.

#147 (1/4"OD), **#567** (5/16"OD) or **#387** (3/8"OD); \$99/ft
#127 (1/2"OD), **#587** (5/8"OD) or **#347** (3/4"OD); \$1.99/ft

Fireproof Gasket Cement

Withstands temperatures of 2000°F while adhering all types of gaskets to steel or cast iron stoves. Also use to hold mica, decorative tiles and firebrick. Goes on as a thick black paste that hardens with heat into a bond that holds. 3 oz capped tube, USA made. **#70-077**; \$3.95

Dutchwest Catalytic Stoves
Our Most Popular Heating Stoves

It's rare to find a product loaded with so many features for so little money. Vermont Castings never sacrifices quality. 100% cast iron construction for even heating and long life

and the striking, Colonial appearance. Left-side loading means longer log lengths (up to 25"). Ashpans ensure clean operation.

Built-in gauge gives catalyst temperature for highest efficiency burns. Add optional 2-speed fan, bottom and rear heatshields, or short legs.

#CDW-2462 Extra Large; \$1229.00 **#VC-1855** Black Painted
#CDW-2461 Large; \$1139.00 8" oval to round adapter
#CDW-2460 Small; \$979.00 (required); \$35.00

Heat-Powered Fan

Redistribute warm air using stove's heat

Large Fan

Reduce hot and cold spots in your room with little trouble and no extra energy. These fans are powered by the heat of your stove. Ingeniously designed, they convert thermal energy into electrical energy. Blades start turning when stovetop reaches about 250°F and automatically increase speed as the stove gets hotter. Unobtrusive and virtually silent, they will amaze and intrigue guests – a great conversation starter! No maintenance or installation required. Aluminum body and anodized brass blades. 1-year warranty, made in Canada.

electrical energy. Blades start turning when stovetop reaches about 250°F and automatically increase speed as the stove gets hotter. Unobtrusive and virtually silent, they will amaze and intrigue guests – a great conversation starter! No maintenance or installation

required. Aluminum body and anodized brass blades. 1-year warranty, made in Canada.
